⚙ TECHNICAL SKILLS

Programming Languages: JavaScript, CSS, HTML, Node
Frontend Libraries: ReactJs, Redux, Axios, SCSS, Bootstrap
Design Tools: Adobe Illustrator, Photoshop, InDesign, Photoshop

UI/UX Design Tools: Figma, Adobe XD, FigJam, Miro
Other Tools: Slack, Jira, Asana, Wordpress,
Soft Skills: Adaptability, Flexibility, Strong work Ethic, Team work

📂 FEATURED PROJECTS

Title: Design and Development of BlueSense: A consulting company website.
Located in Lagos, Nigeria, BlueSense is a consultancy firm. Along with HTML and CSS, the website was built on the foundation of Facebook's frontend library ReactJs. To ensure that the email services integrated into the contact form ran smoothly, Npm packages like EmailJS were deployed. The entire website was created in about one month.

Title: Design and Development of HazelGrace: A fashion web app.
HazelGrace is an online marketplace for fashion. ReactJS, HTML, CSS, and styled components were used to build this. State management was handled by Redux, and API calls were handled using Axios. This web project was developed using MERN, which stands for MongoDB, Express, React, and Node. I finished this job in roughly 45 days.
